

PANKAJ KUMAR GUPTA

AI/Security-Focused Software Engineer | Full Stack Developer

Pune, Maharashtra | +91-8083762133 | pankajkrg2016@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Motivated and quick-learning Computer Applications graduate with hands-on internship experience building full-stack web applications and AI-powered tools. Strong foundation in software development, artificial intelligence, and cybersecurity, supported by industry certifications from Microsoft, Google, and AWS. Eager to bring energy, curiosity, and a collaborative mindset to an entry-level Full-Stack or AI/Security Developer role.

SKILLS

Languages & Databases: Java, Python, JavaScript, SQL, MySQL, MongoDB, PostgreSQL

Frontend & Backend: React.js, Tailwind CSS, Node.js, Express.js, FastAPI

AI/ML & Security: NLP, Computer Vision, LLMs, OpenCV, MediaPipe, AES-256 Encryption, RBAC, JWT Auth

AI Tools: ChatGPT, GitHub Copilot, Claude, Amazon Bedrock

Cloud & Tools: AWS, Git, GitHub, Linux

EDUCATION

Master of Computer Applications (MCA) — MIT World Peace University, Pune

Aug 2024 – Jul 2026

CGPA: 8.56/10

Bachelor of Computer Applications (BCA) — Patna University, Bihar

Sep 2021 – May 2024

CGPA: 9.29/10

EXPERIENCE

Software Developer Intern — HashedBit Innovations

Jan 2026 – Jul 2026

- Built and enhanced [Meal24x7](#), a multi-role (Admin/Restaurant/Customer) food ordering platform using React.js, TypeScript, Redux Toolkit, Node.js, Express.js, and MySQL, with JWT authentication and RBAC middleware.
- Refactored repeated API calls into reusable custom hooks, added a global Shimmer/Suspense loading system and typography presets, and fixed a production crash via defensive coding (optional chaining, fallback handling).
- Ran a structured 5-module QA audit that surfaced 3 critical issues — including an admin password-exposure vulnerability — and shipped an RBAC-aware password-strength validator, resolving all flagged issues.
- Contributed to [Shubhlagan](#), a matrimony platform: fixed OTP/input-validation bugs, migrated hardcoded CSS to Tailwind, redesigned the 404 page, extended the admin CMS with pagination, search, and image upload, and ran a 44-page responsiveness QA audit.

PROJECTS

[Interview.AI](#) · Next.js · FastAPI · GPT-4 · Whisper · MediaPipe · MongoDB

Dec 2025

- Built an AI-powered mock interview platform with voice, video, and text interviews; integrated Whisper for speech-to-text, GPT-4 for answer evaluation, and MediaPipe/OpenCV for real-time facial, posture, and eye-contact analysis.
- Engineered a multi-dimensional scoring engine evaluating 7+ verbal/non-verbal parameters, generating feedback reports via a FastAPI backend with JWT auth.

[CypherStack](#) · Java · AES-256 · MySQL · IDS · Webcam Geolocation

Dec 2024

- Developed a file encryption solution using AES-256, enabling secure file conversion to a proprietary .cyp format with minimal processing overhead.
- Built a real-time intrusion detection system logging webcam snapshots, IP geolocation, and timestamps on suspicious logins; managed user credentials and audit logs in MySQL.

[HireArchy](#) · Java · JSP/Servlets · MySQL · Apache Tomcat · Bootstrap

May 2025

- Architected a role-based job portal (Admin/Employer/Applicant) with JWT auth, RBAC, and a built-in Skill Sense ATS featuring JD-relevance scoring and a Resume Optimizer for skill-gap analysis.
- Managed a MySQL schema supporting active job postings and application records with integrity constraints and audit trail mechanisms.

CERTIFICATIONS

- [Microsoft AI & ML Engineering](#) — Microsoft/Coursera, 5 courses — Aug 2026
- [Google Cybersecurity](#) — Google/Coursera, 9 courses — Aug 2026
- [AWS Generative AI & AI Agents with Amazon Bedrock](#) — Coursera, 3 courses — Aug 2026

ACHIEVEMENTS

- [Appreciation Prize — Ideathon, HACK MIT-WPU'25](#) · MIT World Peace University, Pune (Mar 2025) — Conceptualized SecuScan, an AI-powered security scanner for real-time threat detection, recognized among 14 innovation tracks.
